Project 00-20: Proposed Format for Bibliography of Russian Periodicals

1. Forwarded herewith is suggested format for the new Foreign Documents Branch publication "Bibliography of Russian Periodicals". It is our understanding that the Reference Center is not yet equipped to handle the preparation and dissemination of this bibliographic data by HZ methods, as originally proposed (Paragraphs B, 1 and 2; C, 3 of Memorandum from Chief, Reference Center to Executive for ADM, dated 18 February 1948, a copy of which is attached for your convenience). The material will, therefore, be prepared by Foreign Documents Branch substantially as indicated by the attached samples.

2. The proposed format is designed to allow the table of contents for each journal to be filed separately, if desired. Each sheet, or table of contents for one issue of one journal, will carry its own heading and a serial number. It is proposed to number these serially in order to avoid complicated cross-indexing code numbers. The single sheets may be stapled or temporarily bound together to facilitate dissemination, but should be capable of re-assembly by the recipients.

3. No reference is made to DIB or CIA in the headings or elsewhere on the bibliography, owing to the proposal that the publication should be unclassified. The wide dissemination proposed for this publication will require the use of a multilith press or some similar method of reproduction.

25X1A

4. The proposed format has been discussed with OAS [redacted] and satisfied their requirements as laid down in C. L. No. 3864.1. In view of the fact that some fifty bibliographies are ready for issue as soon as the final form of the publication is determined, it is hoped that a decision on the latter may be reached without delay.

CONFIDENTIAL

1 April 1948

MEMORANDUM FOR THE ASSISTANT DIRECTOR FOR OPERATIONS

Format for New FDB Publication

1. Forwarded herewith is suggested format for FDB publication of tables of contents of Russian periodicals.

2. This format is designed to allow the table of contents for each journal to be filed separately, if desired. Each such table of contents will carry its own heading and serial number. It is proposed to issue these serially in order to avoid complex cross-indexing code numbers. Further, inasmuch as the intention was to issue these unclassified, no reference to CIA is included. Wide distribution requires that these be reproduced on a multi-lith press. Final product will be in general appearance similar to FDB Periodical Abstracts.

3. The following is suggested as an alternate title:

Bibliography of Russian Periodicals.

25X1A

Chief, Foreign Documents Branch.
